ABOUT ME & PROFESSIONAL SUMMARY

Results-driven **Senior Developer** specializing in high-performance cloud architecture, scalable microservices, and modern web/mobile applications using **TypeScript, Node.js, and AWS** (Lambda, API Gateway, EC2, S3). Proven track record in frontend engineering across **React, Vue.js, and React Native**, successfully spearheading cross-platform SaaS products and orchestrating monolithic-to-serverless system migrations that improved system throughput by over 40% and drastically reduced infrastructure overhead.

Demonstrated expertise in designing robust RESTful and GraphQL APIs, optimizing relational databases (MySQL, PostgreSQL), and engineering real-time bi-directional messaging systems via WebSockets. Highly proficient in integrating complex enterprise services, including South African and international payment gateways (Peach Payments, Xero) and automated WhatsApp workflows (WATI API). Passionate about DevOps excellence, leveraging Infrastructure as Code (Terraform), containerized environments (Docker), and continuous integration pipelines (GitHub Actions, GitLab CI/CD) to ensure 99.9% uptime and rapid release cycles.

KEY TECHNICAL & PROFESSIONAL SKILLS

Languages & Frameworks	TypeScript, JavaScript (ES6+), Node.js, React, Vue.js, React Native, PHP, Python
Cloud & DevOps	AWS (Lambda, API Gateway, EC2, S3), Google Cloud Run, Firebase, Docker, Terraform, GitHub Actions, GitLab CI/CD
Databases & Storage	MySQL, PostgreSQL, MongoDB, Firebase Firestore, Redis
Tools & Integrations	Git, RESTful APIs, GraphQL, WebSockets, Peach Payments, Xero API, WATI WhatsApp API, Shopify, WordPress, Monday.com
Soft Skills & Leadership	System Architecture, Agile/Scrum, Problem Solving, Cross-Functional Leadership, Code Mentorship, Adaptability

PROFESSIONAL EXPERIENCE

Senior Developer — FutureRent Jan 2025 – Present | Century City, Cape Town

- **Architected and deployed** a high-concurrency cross-platform mobile application from the ground up using React Native and TypeScript, expanding user reach across both iOS (Apple App Store) and Android (Google Play Store) with a 99.8% crash-free rate.
- **Designed scalable backend services** utilizing Node.js microservices and PHP modules deployed on AWS infrastructure (Lambda, API Gateway, S3), achieving 35% faster API response times and seamless database interactions.
- **Established automated CI/CD pipelines** using GitHub Actions and AWS CloudFormation, automating testing, builds, and store submission workflows to accelerate release cadence from bi-weekly to multi-day deployments.
- **Integrated secure financial transaction workflows** and real-time communication modules, leveraging payment gateway APIs (Peach Payments) and WebSockets to deliver automated lease financing updates to clients.
- **Engineered robust data access layers** with optimized PostgreSQL query planning and connection pooling, ensuring rock-solid data integrity for high-volume financial calculations.

- **Engineered enterprise-grade e-commerce solutions** for premier global brands including Crocs SA, Under Armour SA, Birkenstock SA, and Vans SA, handling peak seasonal traffic spikes exceeding 100k daily active users.
- **Customized Shopify liquid templates and Vue.js frontends**, enhancing user experience (UX), checkout flow conversion rates by 18%, and overall storefront page load speeds by 40%.
- **Architected containerized micro-services** deployed on Google Cloud Run and Firebase, building automated inventory synchronization and order management APIs with Node.js and React dashboards.
- **Implemented streamlined project tracking** and cross-team collaboration frameworks using Monday.com within Agile/Scrum methodologies, reducing feature delivery lead time by 25%.
- **Maintained strict version control standards** and automated testing workflows via GitHub, mentoring junior web developers and conducting peer code reviews to enforce code quality.

Software Developer & Technical Mentor — Life Choices

Jan 2021 – Dec 2022 | Cape Town

- **Developed and maintained full-stack web applications** using PHP, WordPress, Node.js, and JavaScript (Vue.js), building tailored custom plugins that expanded core platform functionality by 30%.
- **Optimized backend database schemas and REST APIs**, accelerating data retrieval rates for student management systems and internal administrative toolkits.
- **Spearheaded technical mentorship and instructional delivery** for coding bootcamp students, teaching modern full-stack web development (JavaScript, HTML5/CSS3, Git, Vue.js, Node.js).
- **Led student engineering teams in collaborative capstone projects**, conducting daily standups, code walkthroughs, and technical evaluation sessions to foster industry-standard software practices.
- **Authored comprehensive technical documentation and learning modules**, resulting in a 90%+ pass and placement rate for graduating developers under direct guidance.

EDUCATION & TRAINING

Software Engineering Program — ALX Africa

Jan 2020 – Dec 2021

Intensive 12-month software engineering program covering full-stack web application development, data structures, algorithms, system design, RESTful API architecture, and DevOps cloud deployment.

Certificate in Full-Stack Web Development — Life Choices Coding Academy

Jan 2020 – Dec 2021

Immersive full-stack engineering program focused on modern JavaScript frameworks, backend runtime environments, version control (Git), and Agile project workflows. Graduated with top honors.

N4 Civil Engineering — College of Cape Town

Jan 2014 – Dec 2015

Foundational engineering studies focused on structural theory, mathematical modeling, technical drawing, and analytical problem-solving methodologies.

INTERESTS & ACTIVITIES

- **Tech & Open Source:** Building side projects, experimenting with new tech stacks, contributing to open-source software.
- **Strategy Gaming:** Competitive chess, complex strategy board games, and RPGs.
- **Outdoors:** Hiking, trail running, mountain adventures, and dog walking.
- **Mentorship:** Guiding emerging developers and community coding initiatives.
